# HOW TO CREATE A UV PRINT FROM YOUR OWN GRAPHICS?

1

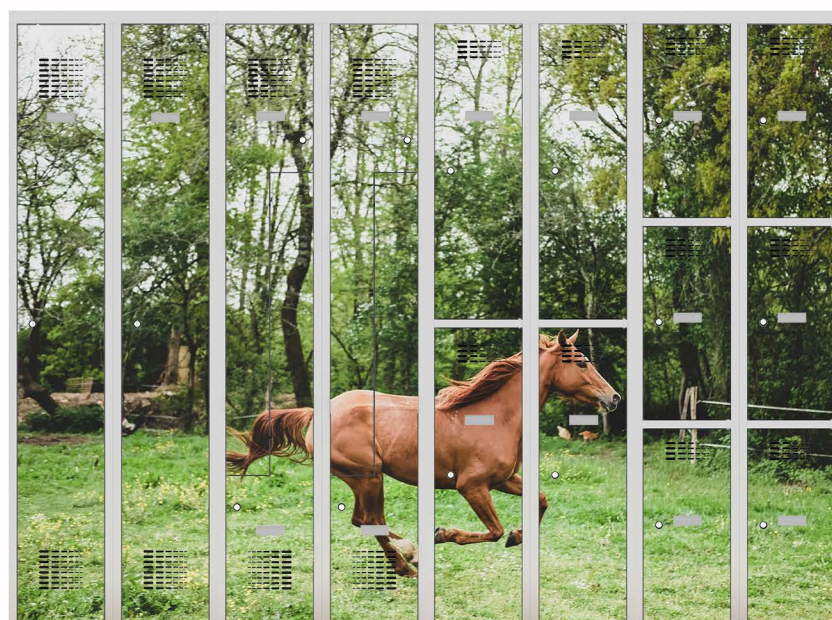

## Select a photo or graphic

Creating your unique UV print should start with selecting a photo or graphic. You can print anything - as long as the graphics meet the technical requirements.

2

## Match the appropriate graphics

Make sure your photo or graphic is large and high quality (minimum: 100 dpi, recommended 300 dpi). The graphic will be cropped to the appropriate proportions. Remember to avoid material that is someone else's copyright.

3

## Send an inquiry about UV printing

Send an inquiry to one of our distributors. Use the QR code in the footer to go to the map. When submitting an inquiry, attach your graphics and describe the idea.

## INSPIRING PROJECTS

### Our customers' designs

Each print is a story...

Get inspired by the surroundings...

Your photos, your story...
