CYLINDRICAL WITH PADLOCK

MECHANICAL COMBINATION

AVAILABLE FOR SOCIAL CABINETS

SERIES 2800 UNIQUE COMBINATIONS: 10 000

Mechanical 2800 combination lock with up to 10,000 unique combinations. The lock offers a wide range of possibilities, including public and private modes. The user can set their PIN and change it at any time in private mode using a mechanical button. The code search function requires the use of a service key, which allows emergency access in the event of a lost or forgotten code (works in public and private modes).

MODE: PUBLIC OR PRIVATE

PRIVATE (FOR REGULAR USER)

PUBLIC (FOR VARIABLE USERS)

COLOUR VARIANTS:

NOTE! Mode MUST be specified at time of ordering!

This lock DOES NOT have the ability to switch between modes!

ELECTRONIC COMBINATION

AVAILABLE FOR SOCIAL CABINETS

SERIES 3780

The 3780 digital combination lock eliminates the need for physical keys. It features an illuminated, audible keypad, LED indicators, and a low battery warning. It supports both public and private modes as standard. In public mode, the lock can automatically open after a set time (1-999 minutes). If the code is lost, access is possible using a Master Code, service code, or mechanical override key. Powered by two AA batteries.

RESISTANT TO
CHLORINE AND MOISTURE

BASIC
VARIANT

SERIES 3781

The 3781 digital combination lock is designed for wet areas and has an IP65 protection rating, making it water-resistant and suitable for wet and chlorinated environments. It features LED indicators, an audible keypad, and a battery status alert that notifies when replacement is needed. The lock supports both private and public modes, with an auto-unlock function after a set time (1-999 minutes). In case of a forgotten code, access is possible via Master Code, service code, or mechanical override key. Powered by two AA batteries.

SERIA 3950

The 3950 HORIZON digital combination lock features an audible keypad and a battery status indicator. It operates in both private and public modes and can be managed remotely via the RAS system. A retractable handle enhances protection against unauthorised access. In case of a forgotten code, the lock can be opened using a service code or Master key. It is powered by a CR123 lithium battery and complies with ADA/DDA standards.

ADVANCED SOLUTION
CLOUD-BASED MANAGEMENT

EQUIPPED
WITH ALARM

Electronic combination lock designed for Malow staff lockers. Supports both private and public modes, with a lockout and audible alarm after four failed attempts. Accepts 4 to 15-digit codes, offering over 30 billion possible combinations. Powered by a battery with a lifespan of up to 5,000 cycles. Emergency access available via service code or override key.

ROXI - C

CYLINDRICAL WITH PADLOCK

AVAILABLE FOR SOCIAL CABINETS

BASIC VARIANT

Required padlock shackle diameter: 5 - 7 mm

The 4441 padlock is a basic padlock used in Malow furniture. The 4441 series is a timeless design at an affordable price. The lock has a shiny nickel chrome finish. This solution works great in schools. The locks are adapted to padlocks with a shackle diameter of between 5 and 7 mm.

SAFE BY NATURE

Required padlock shackle diameter: 6 - 8 mm

The A208 free-swing padlock is a solution with increased security. After closing the padlock, the knob rotates 360 degrees, making the lock impossible to pry and break. The metal lock is available in black. This is a solution dedicated to offices and cloakrooms in public places.

SERIES 4441

SERIES A208

CYLINDRICAL WITH KEY

AVAILABLE FOR SOCIAL CABINETS

SERIES C702

The C702 cam lock is a basic lock used in furniture from the WSU, MSU family. The lock head is finished with black polymer. A suitably large number of combinations and resistance to physical damage make the C702 lock an optimal value for money. The key can only be removed in the closed position. The set includes 2 keys.

COMBINATIONS: 2000
SYSTEM MASTER
BASIC VARIANT

SERIES B671

The B671 series lock is a popular solution with an aesthetically pleasing appearance. The lock head is finished with nickel and chrome. The number engraved on the lock matches the number on the key. The solution is popular in employee lockers. The set includes 2 keys.

AESTHETIC LOOK

SERIES D882

The D882 series lock is suitable for use in furniture with small compartments. Thanks to its short body, it takes up very little space. The shiny nickel finish adds aesthetic appeal. Chrome finish is available upon special order. By default, it is used in telephone cabinets from the WSS family. 2 keys are included.

COIN DEPOSIT

AVAILABLE FOR SOCIAL CABINETS

SERIES 2786

The 2786 deposit lock with a sliding bolt is an economical and secure coin-operated lock in durable plastic housing. The 2786 series is used in dry areas. The 2788 series is designed for wet areas. It is standardly designed for PLN 2 or EUR 1 coins. Additionally, it can be equipped with a coin container (non-refundable version). With the help of a service key, the lock has a replaceable cylinder - this means that in the event of a failure, the entire housing does not have to be replaced. Additionally, a master key is available.

COMBINATION AND DEPOSIT LOCKS

AVAILABLE FOR SOCIAL CABINETS

SERIES 2112

PUBLIC MODE

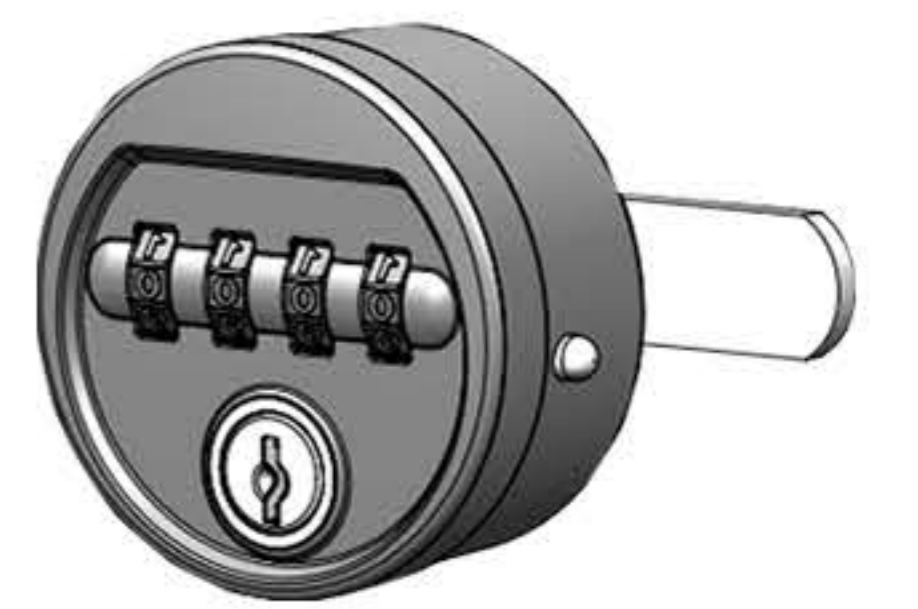

The 2112 series combination lock is in public mode. The lock is operated by an external rotating ring, so the row of numbers can always be read horizontally.

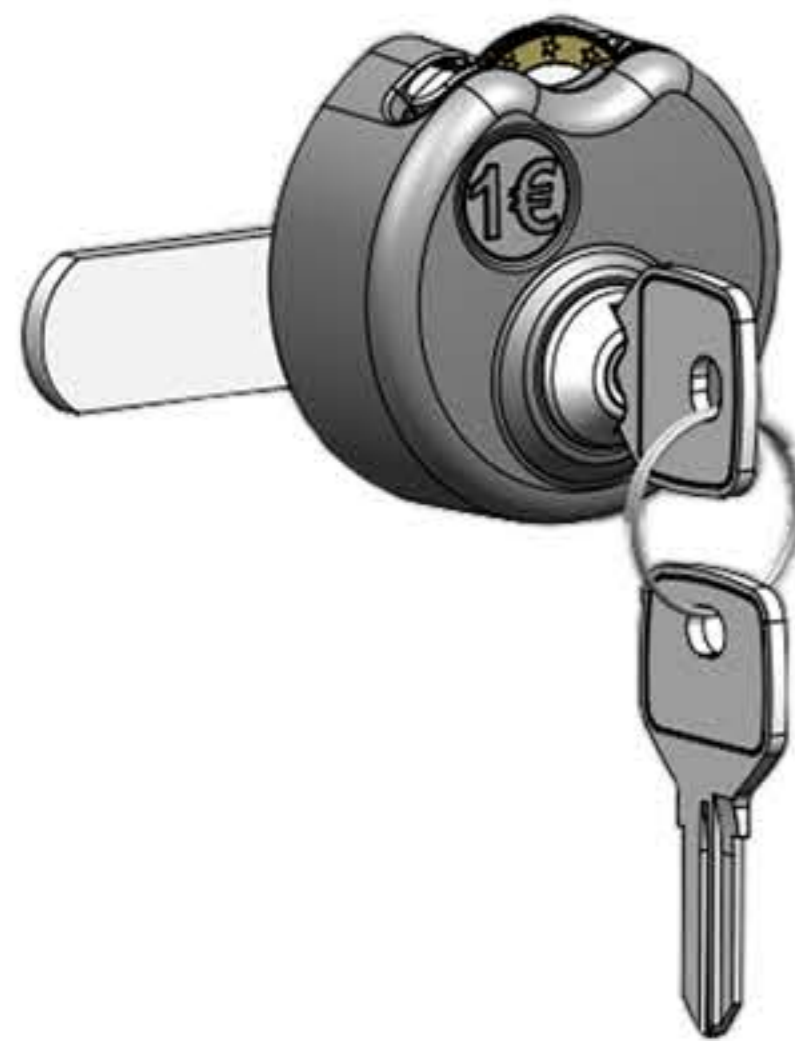

SERIES 1401

PRIVATE MODE

The 1401 series mechanical combination locks are available in private mode. The lock housing is made of easy-to-clean reinforced fibreglass and plastic.

SERIES 1606

Deposit locks for 5 PLN or 1 EUR coins from the 1606 series are characterized by a mechanism placed on the front of the door. Strong jaws holding the coin in the lock will not release it even with the use of tools. An additional functionality is protection against breaking the key.

DEPOSIT LOCK
5 PLN OR 1 EUR COINS

REMOTE TECHNOLOGIES

AVAILABLE FOR SOCIAL CABINETS

VERSA RFID

The VERSA RFID electronic lock allows you to store your belongings safely and easily. RFID technology allows you to open the lock using a master key, a programmed card, a key fob, a special sticker with a chip, a wristband or a mobile application. The lock can be programmed to work with existing employee cards (provided that both systems can be configured together). The lock works in private mode (one user operates one lock) or public mode (many users can use one lock). Coding is very easy, it is done using a special programming key. It is available in horizontal and vertical versions, in black or brushed steel.

ALSO AVAILABLE VERSA KEYPAD

The VERSA KEYPAD lock is an advanced electronic combination lock. It works in public and private mode. It is characterized by impeccable aesthetics and quality of workmanship.

ROXI-K RFID

The ROXI-K HAKNER electronic lock is a modern and practical solution designed for painted metal staff furniture. Operated with RFID (MIFARE) cards, it offers both private and public modes, making it suitable for various applications such as staff lockers, changing rooms, and gyms.

Powered by a CR2450 battery, the lock provides up to 5,000 opening cycles. It supports up to 50 cards, enabling convenient keyless access management. With a 30 mm cylinder length, it fits standard locker bodies perfectly.

QLEO LOCKS

AVAILABLE FOR SBM M, WNL, WNT, LMSW, MSW CABINETS

QLEO RFID

Burg QLEO RFID is a modern solution ensuring convenience and security. It replaces the traditional key with an RFID card, allowing for quick and intuitive unlocking. Thanks to the retro-fit system (72 × 72 mm), it can be easily installed in place of a Ronis lock. It enables access management for up to 10 users in private mode, while an LED indicator provides information about the lock's status. Additionally, battery replacement is simple and does not require device disassembly.

Optional accessories are available for the lock:

- **Master Mifare Card** - unlocks the lock. It blocks the previously used user card and clears the memory
- **Mifare Transponder Card** - a user card that allows locking and unlocking the lock
- **Function Card for Mode Change** - changes the lock's operating mode, e.g., from public to private
- **Reset Card** - deletes all cards from the lock's memory
- **Manager Card** - unlocks the lock but does not block the previously used card or clear the lock's memory
- **Card Unlocking Reader** - used to unblock locked cards

QLEO CODE

Burg QLEO Code is a modern keyless lock operated via an individual PIN code. Its installation is quick and easy thanks to the retro-fit system (72 × 72 mm), allowing for mounting without modifying cabinets. The built-in real-time clock (RTC) enables the use of time-based functions, while battery replacement is conveniently done from the outside. An ideal solution for secure and intuitive access.
