

SZLB LOCKER

Description

SZLB lockers are designed for charging batteries of bicycles and electric scooters. It can be used both indoors and outdoors. SZLB lockers are IP54 rated. The compartments are spacious enough to charge the battery and store tools or bicycle accessories at the same time. Each compartment has an IP54 rated socket.

Long power cord and resettable fuse provide convenience and safety. Adjustable feet help to level the locker, and brackets on the legs allow the SZLB to be fixed to the ground. The roof additionally protects the locker against rain. The hinges are concealed, giving the SZLB a modern look. Floor fasteners are supplied with the locker.

The locker is welded and does not require assembly, thanks to which it gains in strength and stability. As standard, lockers are available in 16 colours at no extra charge.

Features

SZLB

- 5-year warranty (according to the warranty conditions for Malow products)
- Lockers for charging bicycles and scooters batteries, both outside and inside.
- SZLB lockers are welded and delivered as a whole.
- Made from 1 - 3 mm thick steel sheet.
- Each locker has an electric socket with an IP54 rating. As a Standard there are F-type (Schuko) or E-type socket.
- Anchoring components included.
- The SZLB must be connected to the power supply.
- Welded structure that stiffens and strengthens the structure.
- The SZLB is made of galvanized steel and powder painted. The zirconium coating technology used ensures very good corrosion protection of the cabinets. Additionally painted with primer, this improves the adhesion of the polyester paint. Durable and resist polyester paint protects against weather conditions.
- Available in 16 colours from the RAL palette at no extra charge.
